ages been associated with Easter. Perhaps one of the most singular was the playing of ball in the churches. The nignest officials of the church partici-pated in them. While a chant was sung, the clergy joined hands, dancing round and round. Sometimes the ball was tossed from the dean to one or even all suit the sport. Then came refreshments. In the 18th century this game was abolished by the churches, although to this day, it is a game among the people.

Another amusement, which was very common, was the "lifting" at Easter tisle. Parties of eight or ten assembled for the purpose, and then extorted a contribution. This was done out of bright ribbons was carried through the ligence and culture, and a fine orator.

The feat was accomplished by joining hands by grasping the wrists, seating the person to be lifted across the arms and tossing them aloft or carrying them some distance. An equally, ridiculous custom existed in Durham, where the meadaimed the right to take off the worsen's shoes on Monday and the women claimed entirely obsolete, though tanzy cake and pudding continue to be favorite dishes

The earliest name of this festival, its common name at the east, was the Paschal Feast, because it was kept at the same time of the Paschal, or Jewish Passover, to which it was in some measure a successor. Most Christian nations give it the name of Pascha Pasque, Paque or Pask. Our name of Easter is derived, as some suppose, from Eostre, the name of a Saxon deity, whose feast was celebrated every year, in the spring, at about the same time of the Christian festival. This is the most rational supposition, according with fashions followed in Rome, of retaining the name and the days of the festivals of heathen detties, while changing their character so as to conform to the requirements of the Christian religion. Another suppo-sition is that the name was derived from the word Oster, which signifies
